- **External Link Count** — # source
- **IA Item Stats** — # ✧ source
- **IA Book** — # ✧ source

A query or a place

you write the query, or give a coordinate / QID / page title

- **SPARQL Query** — ⌗ source
- **Map** — # 🔌 ✧ ⇢ display

Another card's output

a transformer, a reducer and a readout — useless until something publishes to them

- **Filter Lines** — 🏆 ⚡ ✧ ⇢ transformer
- **Line Count** — # ⚡ ✧ ⇢ reducer
- **Value Display** — 🏆 ⚡ ✧ ⇢ display

How they relate

A card publishes a value on the board; another card reads it.

SHIPPING CHAINS

Article Excerpt → Translator → Speaker

text → language → voice

Text List → Filter Lines → Line Count → Value Display

lines → a number

Gallery → Media Player → Article List

files / lines → a card

BOARD PARAMETERS (a hub, not a chain)

Board Controls → {{name}} in any field

one click re-aims every card that references it
